# Karl Lynuz B. Rapada

Software Developer

Marikina City, Philippines | karlrapada@gmail.com | +63 921 746 8502
www.linkedin.com/in/karl-rapada-88310316a/ | github.com/karlrapada21

## Education

**Bachelor of Science in Information Technology**
IETI College of Science and Technology, Marikina | Graduated June 2026

- Relevant Coursework: Web Development, Mobile Application Development, Database Systems, Software Engineering, UI/UX Design, Machine Learning
- Honors/Awards: Dean's Lister
- Capstone Project*:* **Skin Lesions Detection App Using Artificial Intelligence and Convolutional Neural Networks** – Developed a mobile app that classifies skin lesions from images using a trained CNN model

## Skills

JavaScript, TypeScript, Python, PHP, Java, C#, C++ | React, Next.js, Node.js, Express.js, Laravel, ASP.NET Core, Flask | MySQL, PostgreSQL, MongoDB | Docker, AWS, Git | REST APIs, PyTorch, OpenCV

## Experience

**IT Intern (Web Developer)**
Knowles Training Institute, Singapore | Jan. 13 – April 28, 2026

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, SQL, and REST APIs.
- Improved internal web tools by applying UI/UX best practices, streamlining user workflows.
- Integrated a CNN-based image classification feature into a web application prototype for AI-assisted skin lesion analysis.
- Collaborated with developers to deliver clean, maintainable code while consistently meeting project deadlines.

**Freelance Web Developer**
Self-Employed | 2024 – Present

- Designed and developed responsive websites for small businesses and individual clients.
- Built custom web solutions using modern front-end technologies while ensuring cross-browser compatibility and mobile responsiveness.
- Managed projects from client requirements through deployment, maintenance, and post-launch support.

## Projects

**SkinLesionAI – AI-Powered Skin Lesion Analysis Platform**
https://github.com/karlrapada21/skin-lesion-detection | Flask, PyTorch, SQLite, Bootstrap, OpenCV, Grad-CAM++

- Developed an AI-powered web application that classifies 8 skin lesion types using a ResNeXt50 deep learning model achieving 85% classification accuracy.
- Integrated Grad-CAM++ visual explanations to improve prediction interpretability

**BITSI Dispatch – Real-Time Bus Dispatch Management System**
https://github.com/IAmKhirvie/bitsi-dispatch | Laravel 12, Livewire 3, Tailwind CSS, MySQL, Semaphore API

- Developed a real-time fleet dispatch management system with live vehicle monitoring.
- Implemented driver attendance tracking, preventive maintenance scheduling, and SMS notifications.

**Intern Management System**
https://github.com/bigbusbeluga/umonics-attendance-reporting-system | React, Vite, Tailwind CSS

- Developed a web-based internship management platform supporting attendance tracking, task management, and role-based access.

## Certificates

CCNA 1 – 3 | TOPCIT Level 3 | NCII CSS & ICT | Python Essentials 1 – 2 | Comptia A+
